IMPORTANT NOTICE

WATER MAIN FLUSHING TO BEGIN ON OCTOBER 19, 2015

Dear Water Department Customer:

On Monday, October 19th the Water Department will initiate a two week program to flush the water mains. Flushing the water mains from unwanted sediment is part of the regular long-term maintenance program for our water lines.

During the week of October 19th the water lines in the Village of Tuxedo Park will be flushed, and during the week of October 26th the water lines in the Town of Tuxedo will be flushed. Flushing will begin at 7:30 A.M. and end at 2:30 P.M. each day. Homes in the higher elevations may be without water past 2:30 P.M. There will be no flushing on Saturdays and Sundays. Assuming cooperation from Mother Nature, the program will be completed within two weeks.

Each day we will post a message on our answering machine (845-351-2777) to advise you where the program will begin on the following day. **Owners of rental properties should inform their tenants of the flushing program.**

What can you expect?

- All customers will experience discolored water during the flushing periods.
- Customers living at higher elevations will have no water or very low water pressure during flushing hours.

What can you do to lessen the impact?

- If you have a household auxiliary booster pump installed in your home, we strongly advise you to shut it off manually during flushing hours. Otherwise, the motor may be damaged as it runs continuously to draw water that is not available.
- Use very little to no water during the flushing hours. This will decrease the amount of sediment introduced into your household system.
- Do not use hot water during the flushing hours. Sediment may enter your hot water system.
